CodeChef | LeetCode

PROFESSIONAL SUMMARY

MCA graduate with a foundation in full-stack software development and software engineering. Experienced in building web applications using JavaScript, React.js, Node.js, Express.js, MongoDB, PostgreSQL, and SQL, with project experience integrating REST APIs and AI services. Knowledge of data structures and algorithms, object-oriented programming, database design, debugging, and API testing. Seeking an entry-level Software Developer, Full-Stack Developer, or Backend Developer role.

EDUCATION

Babasaheb Bhimrao Ambedkar University (Central University), Lucknow 2024 – 2026
Master of Computer Applications (MCA) | CGPA: 6.93/10 *Lucknow*
Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Software Engineering, Operating Systems, Computer Networks

PROJECTS

PDFStudy AI *Final Year Project*

- Developed a full-stack web application for interacting with PDF documents through AI-powered question answering, summarization, and content analysis.
- Built responsive frontend features with React.js and backend services with Node.js and Express.js.
- Developed RESTful APIs connecting the frontend, backend, MongoDB database, and AI services.
- Integrated AI APIs to support document-based responses, text summarization, and content processing.
- Implemented authentication and file-upload workflows for document processing, and used MongoDB to store application data.
- Debugged and refined frontend, backend, API, and document-processing workflows.

AI Code Reviewer *AI-Powered Developer Tool | In Progress*

- Building an AI-powered code review tool that analyzes submitted code for potential bugs, code-quality issues, and improvement opportunities.
- Implementing Server-Sent Events (SSE) to stream AI-generated review responses and provide feedback progressively.
- Integrating Google Gemini (`gemini-3.8-flash`) through a Node.js and Express backend to generate actionable review feedback and suggested fixes.
- Using Redis for session records, rate limiting, and concurrency leases; containerizing services with Docker and Docker Compose.
- **Tech Stack:** React, Vite, Monaco Editor (self-hosted), Node.js (LTS), Express, SSE, Google Gemini, Redis, Docker, Docker Compose, Nginx, Vercel, Render.

Hostel Management System *Academic DBMS Project*

- Designed a database-driven system to manage hostel operations and administrative records.
- Created normalized database schemas to improve data integrity and reduce data redundancy.
- Wrote SQL queries using joins, views, and CRUD operations for data retrieval and management.
- Implemented database operations for hostel and administrative records and supported data-driven reporting.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL, C++
Frontend: React.js, HTML5, CSS3, Responsive Web Design
Backend and APIs: Node.js, Express.js, RESTful API Development, API Integration
Databases: MongoDB, PostgreSQL, MySQL, Database Design, SQL Queries
Tools: Git, GitHub, Postman, VS Code
Computer Science: Data Structures and Algorithms, Object-Oriented Programming, DBMS, SDLC, Software Engineering, Operating Systems, Computer Networks
Additional: AI API Integration, Prompt Engineering, AI-assisted Development (ChatGPT, Claude, Gemini)

ACHIEVEMENTS

- Qualified UGC NET – June 2026 for Assistant Professor and PhD Eligibility.
- Solved 450+ Data Structures and Algorithms problems across LeetCode and CodeChef.
- Participated in the Smart India Hackathon (SIH) and was selected at the university level for a team-based software solution.

ADDITIONAL INFORMATION

Professional Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Time Management, Adaptability, Attention to Detail
Languages: English , Hindi (Native)
